Subject: CES: (b) (6) (Possible Service Project)
 All:

I was wondering if you had the means to assist me with the following resident.

(b) (6)

(b) (6) has a garden in his back yard that is not growing very well. I took a sample to the Texas Agrilife Extension Service and you can see their response below. (b) (6) is an older gentleman and believes that the "fog" coming off of CES has somehow impacted his soils and is preventing him from his ability to grow collard greens and tomatoes. He is fairly distant from the site and is not near the drainage ditches so I don't believe it is likely that this is the issue. Also, it appears that other vegetation is going well.

What I wanted to see is if there was a possibility that the groups could get together and maybe assist him in preparing raised beds. I am not sure if this is possible but it would be a good community service project.

Thank you,
